

Be The Leader... made, not born!

We need our managers to be effective leaders and capable agents for change. Our managers need to be high performing in order to help Capgemini continue to grow and exceed client expectations.

Leadership analysis and a diagnostic mobile app helped managers lead more effectively. 2017 will see us build on this with 'Leader in Me' – which will propel lower-level management to new heights.

Be the Leader has helped us identify high-potential managers. The positive impact of this program was reflected in the 2016 Group Employee Survey. Manager effectiveness in Poland BS was ranked at 78%.
