

# Virtual Delivery Center

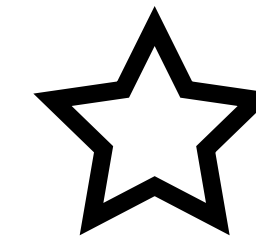

New technologies now reach beyond our imagination. Can we leverage this potential? Can we quickly find an existing technology to improve our work? Do we know where and how to apply it?

The VDC doesn't just offer RPA, AI, Digital and other buzzwords. It is designed to help you choose the right technology and implement it in agile way with minimal disruption for your organization.

*All new RPA solutions are now autonomous artifacts,  
executed in a virtualized computing environment.*

*We have created 313 RPA assisted robots and 51  
autonomous robots. VDC is also available externally.*
