

# TR Tool for Debt Management

Our main problem was time waste on manual work. That was major cause for large workload.

To resolve our problem we used our own IT resources and employ tailor made automation. It allowed us to minimise the repetitive tasks and focus on more stimulating tasks.

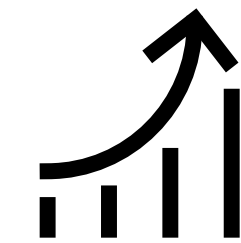

*As a result of automation we have saved our time, avoid additional cost of third-party software and focus more on tasks related to cash collection and building relation with our stakeholders.*

#### BEFORE AND AFTER

### Minimise time waste

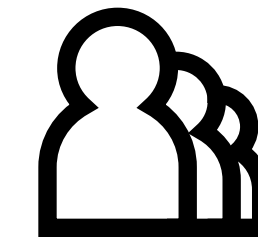

Comparison between the old process and the new one

#### COST SAVING

### Use own IT resources

We don't have to spend extra money on third-party software

#### STAFF RETENTION

### Satisfaction

Focus on more stimulating tasks and customer relation

# The Team
