

Catching two birds with Visual and Ritual HR SSC

Our employee engagement was low, our operational performance was not predictable, reliable, simple enough: our clients were not delighted.

We leveraged lean manufacturing from our plants to anchor visual and ritual lean management in our office. We empowered our teams to drive this transformation by themselves and for themselves.

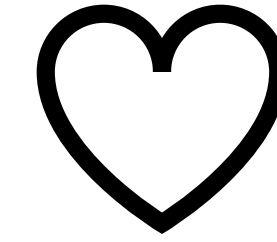

Our project has been done by and for our Teams. Our main aim was to foster the collaboration, increase engagement and improve customers satisfaction. All goals have been achieved
