

All for one, one for all: Colocation of Lubricants Supply Chain

The Supply Chain of a key business in EMEA wanted to strengthen its competitive position by reinforcing its cost base and by achieving bolder business performances.

Set a first in time Centralized Material Scheduling Teams in SBO Krakow to achieve outstanding financial and non-financial gains.

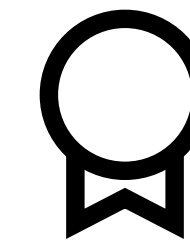

The colocation of Lubricants Supply Chain can be seen as a business process re-engineering solution coupled with a continuous improvement program and a new unified communication center.
